INDEX TO VOLUME 50

BASSOM, A. P. see LEWIS, S.

BEATTY, M. F. and JIANG, Q. On compressible materials capable of sustaining axisymmetric shear deformations. Part 2: Rotational shear of isotropic hyperelastic materials 211

BREVIK, I. and SOLLIE, R. Fluxes of mass, momentum and energy in currents of uniform vorticity 1

BROAD, A. S., PORTER D. and SEWELL, M. J. New shallow flows over an obstacle 625

CAO, J. Computer-extended perturbation solution for the large deflection of a circular plate. Part II: Central loading with clamped edge 333

CONSTANDA, C. Fredholm equations of the first kind in the theory of bending of elastic plates 85

DASSIOS, G. and KAMVYSSAS, G. The impedance scattering problem for a point source field. The small resistive sphere 321

DOOLE, S. H. The bifurcation of long waves in the parameter space of pressure head and flowforce 17

DROZDOV, A. D. Explicit stability conditions for integro-differential equations with operator coefficients 261

FABRIKANT, V. I. Interaction of an arbitrary force with a flexible punch or with a penny-shaped crack 303

FITT, A. D. and LATTIMER, T. R. B. A high-Reynolds-number cross-flow with injection and suction 47

GREGORY, R. D. Uniform bounds for $P_n^m(\cos\theta)$ and the absolute convergence of series expansions in spherical surface harmonics 467

HAUGHTON, D. M. and MCKAY, B. A. Inflation of joined dissimilar elastic tubes 69

HILGERS, M. G. Dynamics of elastic sheets with bending stiffness 525

HOWE, M. S. Sound generated by turbulence and discrete vortices interacting with a perforated elastic plate in low-Mach-number flow 279

JIANG, Q. see BEATTY, M. F.

JONES, D. S. Scattering by a cone 499

KAMVYSSAS, G. see DASSIOS, G.

KUZNETSOV, N. and MCIVER, P. On uniqueness and trapped modes in the water-wave problem for a surface-piercing axisymmetric body 565

LATTIMER, T. R. B. see FITT, A. D.

LEE, V.-G. see TING, T. C. T.

LEWIS, S., REES, D. A. S. and BASSOM, A. P. High wavenumber convection in tall porous containers heated from below 545
McIVER, M. see McIVER, P.
McIVER, P. and McIVER, M. Trapped modes in an axisymmetric water-wave problem 165
McIVER, P. see KUZNETSOV, N.
McKAY, B. A. see HAUGHTON, D. M.
MURPHY, J. G. A family of solutions describing spherical inflation in finite, compressible elasticity 35
NAKAMURA, G. and TANUMA, K. A formula for the fundamental solution of anisotropic elasticity 179
NEPOMNYASHCHY, A. A. and SIMANOVSKII, I. B. New types of long-wave oscillatory Marangoni instabilities in multilayer systems 149
PORTER D. see BROAD, A. S.
RAVINDRAN, R. Strong shock approximation in the new theory of shock dynamics 251
REES, D. A. S. see LEWIS, S.
RILEY, D. S. see SHIPP, D. J.
ROCHDI, M. and SOFONEA, M. On frictionless contact between two elastic–viscoplastic bodies 481
ROGERSON, G. A. and SANDIFORD, K. J. Flexural waves in incompressible pre-stressed elastic composites 597
ROMEO, M. SH surface waves in layered half-spaces 581
SANDIFORD, K. J. see ROGERSON, G. A.
SCHIAVONE, P. Mixed problems in the theory of bending of elastic plates with transverse shear deformation 239
SEWELL, M. J. see BROAD, A. S.
SHAIL, R. Some regular perturbation solutions in fluid mechanics 129
SHIPP, D. J., RILEY, D. S. and WHEELER, A. A. On asymptotic methods for bifurcation and stability: Confined Marangoni convection 379
SIMANOVSKII, I. B. see NEPOMNYASHCHY, A. A.
SMITH, F. T. see WALTON, A. G.
SOFONEA, M. see ROCHDI, M.
SOLLIE, R. see BREVIK, I.
STUART, J. T. The Quarterly Journal of Mechanics and Applied Mathematics 1947–1997 497
TANUMA, K. see NAKAMURA, G.
TARANTINO, A. M. Nonlinear fracture mechanics for an elastic Bell material 435
TING, T. C. T. and LEE, V.-G. The three-dimensional elastostatic Green's function for general anisotropic linear elastic solids 407
TRAN-CONG, T. On the solutions of Boussinesq, Love, and Reissner and Wennagel for axisymmetric elastic deformations 195

WALTON, A. G. and SMITH, F. T. Concerning three-dimensional flow past a tall building on flat ground 97
WANG, Z.-W. The geometrically nonlinear theory of anisotropic sandwich shells faced with laminated composites 349
WHEELER, A. A. see SHIPP, D. J.
WILLIAMS, W. E. A class of Dirichlet problems for the Helmholtz equation 457
ZHANG, K. Stability of the elastic energy in star-shaped domains 427
